Professional Profile

I have a First-Class Honours degree in Computing and a strong passion for different aspects of software engineering. I understand key usability, security, networks and database principles. I have programmed using Python, Java, JavaScript, TypeScript, Dart, and Sql. I have made multiple applications from AI models to web apps. I enjoy designing/making things and I consider myself to be creative and good at problem solving. I am eager to develop my skills, collaborate with experienced professionals, and contribute to creating innovative software. You can find a more comprehensive view of my profile and projects at [portfolio](#), complete with pictures and running prototypes.

Skills

- I can use programming languages: Python, Java, TypeScript, Dart, and PostgreSQL
- I can use frameworks and libraries: Spring Boot, React, Next.js, Flutter, Three.js, and Tailwind CSS
- I have implemented databases using: Firebase, and PostgreSQL
- I have core knowledge on: usability, security, networks, software engineering, testing methodologies, databases, 3D modelling, animation, artificial intelligence, and cryptography
- I have used resources such as: VS Code, IntelliJ, Pyzo, Cisco Packet Tracer, Github, CI/CD tools, Lucidchart, Firebase, Stable Diffusion, TripoSR, and more
- I have developed: full stack web applications, a full stack mobile application, genetic algorithm models, neural network models, AI processing pipelines, 3D models, 3D animations, security protocols and network models
- I have experience integrating and working with APIs: Firebase, Edamam API, Hugging Face, Stability AI, RESTful API design, and local AI model deployment
- I have experience with CI/CD pipelines for automated build and deployment
- I have implemented unit and widget testing using Dart testing frameworks on multiple applications
- I have worked as part of a development team on various occasions

Experience

Bill's Restaurant - November 2021 to September 2023

Worked in a fast-paced environment, assisting back-of-house operations with kitchen support duties. Provided efficient and reliable assistance to ensure smooth workflow.

Spares for Homes - March to July 2020

Managed order processing tasks, including printing, packing, and shipment preparation,

ensuring accuracy and efficiency. Assisted with inventory control by checking in deliveries.

Tree Felling - July to September 2020

Performed log chopping and branch shredding tasks, ensuring efficient processing materials. Maintained a safe and organised work environment while handling equipment.

Education

University of Portsmouth 2022-2025:

BSc Computing, First Class Honours

Year 2 Avg: 74.4 Year 3 Avg: 70 GPA: 4.00

Modules included: Software Engineering Theory and Practice, 3D Computer Graphics and Animation, Database Principles, Artificial Intelligence, Advanced Networks, Security and Cryptography, Usability Testing, and more

Cheam High School 2020-2022:

2 A-levels: Accountancy B and Mathematics C

1 BTEC: Information Technology, Distinction*

Cheam High School 2015-2020:

9 GCSEs: English literature, English language, Mathematics, Physics, Chemistry, Biology, Computer Science, Geography and French

1 BTEC: Creative Media

Hobbies and Interests

I enjoy gaming, particularly open-world adventures in sci-fi and fantasy genres. I maintain a disciplined weight training routine. I use fashion and tattoos as forms of self expression. I have visible tattoos, including on my face, neck, and hands.
